BLUEPRINT FOR SUCCESS
STRATEGIC CONSULTING WITH AVISHAI WOOL

Do you want to securely accelerate your application delivery, speed up your digital transformation, automate your network security management, embrace SDN technology, or migrate more of your resources to the cloud? Turn your vision into reality with the AlgoSec Blueprint for Success.

Invite your executive and operational team to a half-day session with Prof. Avishai Wool, AlgoSec CTO & co-founder. He is the expert who *invented* the category over 25 years ago at Bell Labs.

You will take away a practical blueprint showing you how to get the most out of your existing network security investments.

Who Will Benefit?

- AlgoSec Executive Sponsor
- AlgoSec Project Manager
- AlgoSec Technical Lead
- Network Security Policy Change Process SME/Owner
- DevOps/Developer SME for Network Security Policy Changes
- Cloud Migration Lead

Your tools should serve your strategy, not the other way around. Are you using them to their full potential? If they "just work," that is not enough.

Ensure that you are set up for success so you can always realize your vision and maximize the ROI of your AlgoSec investment.

Prof. Avishai Wool, together with AlgoSec's senior security solutions architects and professional services experts, will evaluate your strategic goals and current network environment and show you how to turn your vision for your network into reality.

WHAT IS INCLUDED?

Review strategic goals and network security maturity level

- Clarify your organization's network security policy management goals
- Discovery: Walk through your existing network security policy change process, as well as your audit and reporting process

Share our CTO's vision and learn successful adoption methods to maximize your investment

Get more out of the AlgoSec platform

- Enable application owners
- Integrate with third-party systems
- Discover how to use AlgoSec to stop ransomware in its tracks before it damages your network
- Audit your existing AlgoSec system

Get deeper insights into AlgoSec's product roadmap "Blueprint for success" with actionable recommendations
