

Secure application connectivity across your hybrid environment

With companies relying on more applications, more connections, and more layers, networks are now 100x more complex. Development teams are adopting cloud technologies and automation to accelerate deployments, while security teams face the challenge of managing threats across hybrid environments.

A significant convergence of cloud and datacenter security teams is emerging, driven by the need for unified strategies to ensure seamless policy enforcement, improved threat management, and consistent compliance across on-premises and cloud infrastructures. These changes are transforming how organizations address scale, speed, and security in the modern IT landscape.

The AlgoSec Horizon Platform

AlgoSec lives at the intersection of your infrastructure, security policy and the applications that run your business.

The AlgoSec Horizon platform is the industry's first and only application-centric security management and automation platform for the hybrid network.

It helps organizations securely accelerate application delivery by automating application connectivity and security policy management across hybrid network environments, including public cloud, private cloud, containers, and on-premises networks.

The AlgoSec Horizon platform is purpose-built to align network security with your business needs

- 1 Visibility that matters:** Gain a unified view of application connectivity across enterprise and cloud networks, identifying risks and dependencies at every layer. This allows your security teams to reduce complexity and improve decision-making.
- 2 Automation you can trust:** Eliminate application delivery bottlenecks with intelligent automation of policy changes and compliance workflows, allowing faster, error-free security changes that align with the speed of modern business demands.
- 3 Continuous compliance:** Ensure continuous compliance with proactive compliance awareness, risk mitigation, and streamlined remediation processes.
- 4 Resilience through innovation:** Align security with business needs, enabling rapid application deployment while minimizing downtime and security risks.

Five reasons why leading infosec teams choose AlgoSec

Your applications always come first: AlgoSec's patented application-centric view of the hybrid network simplifies infrastructure complexity by dynamically associating connectivity flows with specific applications, ensuring they remain secure and uninterrupted in the 100x growth revolution.

The only complete hybrid network solution: Visualize and manage the application connectivity and security policies across all public clouds, private clouds, containers, and on-premises networks.

Zero-touch change automation: Rapidly plan and execute application connectivity and security changes - all with zero-touch and orchestrated across all security groups and filtering technologies.

Full integration with your existing tech-stack: Complete integration with leading ITSM, SIEM, vulnerability scanners, identify management, and orchestration systems promotes a holistic, more robust security posture.

Empower security teams through convergence: Harmonize compliance frameworks and streamline governance across cloud and on-premises infrastructures. Reduce silos and achieve consistent policy enforcement to improve risk management and operational efficiency.

About AlgoSec

AlgoSec, a global cybersecurity leader, empowers organizations to securely accelerate application delivery up to 10 times faster by automating application connectivity and security policy across the hybrid network environment. With two decades of expertise securing hybrid networks, over 2200 of the world's most complex organizations trust AlgoSec to help secure their most critical workloads.

AlgoSec Horizon platform utilizes advanced AI capabilities, enabling users to automatically discover and identify their business applications across multi-clouds and datacenters, and remediate risks more effectively. It serves as a single source for visibility into security and compliance issues across the hybrid network environment, to ensure ongoing adherence to internet security standards, industry, and internal regulations.

Additionally, organizations can leverage intelligent change automation to streamline security change processes, thus improving security and agility. Learn how AlgoSec enables application owners, information security experts, SecOps and cloud security teams to deploy business applications faster while maintaining security at www.algosec.com.
