algosec

Secure application connectivity.
Anywhere.

AlgoSec Cloud Enterprise
Cloud connectivity without compromise

Unlock the power of secure cloud transformation

- Network & cloud security
- Visibility
- Compliance
- Agility

AlgoSec Cloud Enterprise (ACE) empowers you to achieve it all, protecting your business in the dynamic cloud landscape.

Cloud adoption is accelerating, but security is struggling to keep pace. Complex multi-cloud environments, evolving threats, and the widening visibility gaps in cloud deployments are creating a challenging landscape for organizations seeking to protect their critical assets.

ACE is a comprehensive hybrid and cloud network security solution designed to empower organizations to confidently navigate the complexities of the cloud. It provides:

The comprehensive cloud network security platform
Unifying security across your applications

ACE — AlgoSec Cloud Enterprise

- Deep application visibility
- Automate security & compliance
- Unified security policy management
- Streamlined change management

With AlgoSec Cloud Enterprise, businesses gain the holistic control they need to protect their critical assets, streamline operations, and accelerate secure application delivery in the cloud.

Key capabilities

AlgoSec Cloud Enterprise (ACE) empowers your organization to secure your hybrid and cloud environment with confidence. AlgoSec's comprehensive suite of solutions, including ACE, provides deep visibility, automated security, and streamlined change management to protect your critical applications and data. ACE provides a comprehensive suite of capabilities to help you secure your cloud network security, including:

Application discovery and visualization: Identify and map all of your cloud applications, including their dependencies, components, and vulnerabilities.

Security policy management: Define and enforce security policies across your entire application portfolio, including cloud-native security groups and network access control lists (ACLs).

Network micro-segmentation: Isolate your applications from each other and from unauthorized users, reducing the blast radius of potential attacks.

Compliance monitoring: Ensure that your applications comply with industry regulations and standards, such as PCI DSS and HIPAA.

Streamlined troubleshooting: ACE meticulously tracks and logs every security policy change, providing you with a comprehensive audit trail. You can use this audit trail to troubleshoot issues, identify root causes, and demonstrate compliance.

Detect and prevent risks across the supply chain and CI/CD pipelines: Identify network security vulnerabilities in applications and block malicious containerized workloads from compromising business-critical production environments.

AlgoSec Cloud Enterprise: Your key to a secure and agile cloud

Imagine a future where cloud security is seamless and empowering. With AlgoSec Cloud Enterprise, you can make that a reality. Empower your developers to build secure applications by design. Equip your network teams to manage complexity with confidence, even with the rise of unmanaged cloud resources. Thrive in the cloud, free from the fear of cyberattacks.

Request a demo today and discover how AlgoSec Cloud Enterprise can empower your organization to achieve a secure and agile cloud environment.

Ready to elevate your cloud security?

Don't wait for a security incident to happen. Take proactive steps to protect your valuable cloud-native applications today.

Contact us to:

- **Schedule a personalized demo:** See Prevasio in action and learn how it can address your specific security needs.
- **Discuss your cloud security challenges:** Our experts are here to listen and offer guidance on best practices for securing your cloud environment.

Visit the AlgoSec website or contact us today to take the first step toward a more secure cloud future.

About AlgoSec

AlgoSec, a global cybersecurity leader, empowers organizations to secure application connectivity by automating connectivity flows and security policy, anywhere.

The AlgoSec platform enables the world's most complex organizations to gain visibility, reduce risk, achieve compliance at the application-level and process changes at zero-touch across the hybrid network.

Over 1,800 of the world's leading organizations trust AlgoSec to help secure their most critical workloads across public cloud, private cloud, containers, and on-premises networks.
